READ DISCUSSION OF MEXICO'S "CURRENCY" ON EDITORIAL PAGE AND A WAY TO SHORTEN WAR

if their figuretal schemes are equal. Chere is nothing to prevent them from printing enough "money to buy the whole United States.

If the paper were made redeem-able in nothing but paper (as in Mexico at the present time, it would tend the depreciate more and work, until prices went sky high gold vanished by hearding or ex-port and panio ensued.

The fint currency insued by the various Mexican factions has multiplied in variety and quantity so that the game is about up.

It begins to look as if every fac-tional lender has to have his own personal currency.

The man who receives the stuff at more than the value of the paper it contains is taking a great risk. The brunt of the injury falls on Mexico and the Mexican people.

The world has lost all confidence in the intention or ability of the present despoilers of Mexico to maintain the gold reserves which at one time kept the peso steady pround is to 50.

A short way to end the whole mess in Mexico would be for all foreigners dealing with Mexico to put the bar un all of the factional paper issues.

If there were a general refusal to accept this staff for anything, the zidity of the men who are keeping up the disturbance in Mexico, to maintain and supply themselves, would soon cease, and with the straining of gold and aliver from the country, the "war" would have to come to an end for lack of material.

Nothing but ruin stares Mexico in the face if this recklessness in paper money issues keeps up.

Mexico will be bankrupt, and all the latent wealth in the treasure houses of her sierras will not then syall to save her from humiliation and disaster—she alone can nave herself, but she ought to knew that printing and issuing more of her ridiculous wildeat "carrency" will only hasten the end.
